

// 🌞 2. 讓首頁彈窗能讀取到您在 formula.vue 建立的真實配方！

```
const loadLocalRecipes = () => {

  try{

    const localStr = localStorage.getItem('bincoo_my_recipes')

    if (localStr) {

      const rawRecipes = JSON.parse(localStr)

      // 將資料轉換成首頁彈窗 UI 需要的格式 (powder, ratio, temp)

      localRecipes.value = rawRecipes.map((r: any) => {

        return {

          ...r, // 保留原始所有欄位，跳轉時才拿得到 configJson

          id: r.id,

          name: r.name,

          powder: r.configJson?.legumes || 0,

          ratio: r.configJson?.proportion ? r.configJson.proportion / 2 : 0,

          temp: r.configJson?.accordionItems?.[0]?.temperature || 92

        }

      })

    } else {

      localRecipes.value = []

    }

  } catch (error) {

    console.error('讀取首頁配方失敗:', error)

  }

}
```

[illegible]

```
console.log('開啟配方庫彈窗..')
```

`recipeShow.value = true` // 開啟包含「我的私藏」與「官方精選」的底部彈窗

```
currentTab.value = 'cloud'
```

}
